

TJ Kyong (경태진)

AWS Solutions Architect

My work experience is in Audio Visual solutions design and sales. But my desire to change gears to IT has me attracted to AWS. I recently completed the Google IT Support certification, and am currently studying to take the AWS SAA-C02 examination on September 1st. I love to learn and am looking for entry/associate level positions in IT or Cloud Networks. I have a F-4 VISA and eligible to work.
